

Bugawuga

USER GUIDE · PILOT NEDERLAND → SURINAME

User guide

How BugaWuga works — per profile. This document bundles all roles.

ROLE · EVERYONE

Getting started

The basics that apply to every profile.

Log in, language & display

- **Log in** — with your email and password, or via the button at the top.
- **Language** — pick Dutch, English, Spanish, Portuguese, French or Chinese.
- **Theme** — one button toggles light, dark and automatic.
- **Install the app** — the install button runs BugaWuga as an app on phone or desktop.

Navigating

- **Menu** — on the left (desktop) or the bottom bar (mobile). Numbers next to an item show what's new or open.
- **Overview** — your home page with the key things at a glance.

Chat & agreements

- **Chat** — available wherever you deal with another party.
- **Quick questions** — shortcut buttons help you ask the right thing fast.
- **Agreement** — stays pinned at the top of the chat for both parties.

Notifications, profile & feedback

- **Notifications** — the bell shows unread updates.
- **Profile & verification** — manage your details under My account; a ✓ means verified.
- **Feedback** — the 💬 button sends remarks straight to the team.

ROLE · SENDER

Send something

From creating a shipment to payment and delivery.

1. Create & check

- **Send** — enter corridor, recipient, weight and the contents per item.
- **Free check** — instantly see whether it may travel via a traveler and an indicative price.

2. Make it visible

- **On the marketplace** — make your request visible so travelers can see it.
- **Public (optional)** — also show it anonymously on the public site (first name + initial only).

3. Offer, agreement & payment

- **Receive an offer** — a chat opens automatically when a traveler responds.
- **Accept & pay** — the amount is held until proof of delivery.

4. Track & deliver

- **Timeline & label** — follow every step and open/print the label.
- **Receipt code** — give the 6-digit code to the recipient; delivery is only confirmed once it matches.

5. After delivery

- **Rate** — leave stars for the traveler.

- **A problem?** — open a claim/return or report a user.
- **Handy** — address & product book and bulk upload for multiple shipments.

ROLE • TRAVELER

Offer space

Earn on the side by carrying packages on your trip.

1. Publish a trip

- **My trips** → **New trip** — enter corridor, date and capacity.
- **Make it visible** — set your trip visible (optionally anonymously on the public site).

2. Offer & agree

- **Marketplace** — view open requests and place an offer with a message.
- **Chat** — agree the details and price; pin the agreement.

3. Carry & deliver

- **Status steps** — go through the steps up to Delivered.
- **Receipt code** — enter the code the recipient gives you; if it matches, your payout is released.

4. Earnings

- **Wallet** — see your balance and points.
- **Payout** — request a payout once your balance reaches the threshold.
- **Rate** — leave a rating for the sender.

ROLE • HUB / OPERATIONS

Processing

Intake, inspection, custody and transport.

Intake & sealing

- **Inspect** — run the checklist and seal with a seal number.
- **Chain of custody** — every handover is recorded and cannot be changed.

Transport

- **Manifests & legs** — create a manifest, link shipments and advance the status.
- **Lockers & timeslots** — assign a package to a compartment (with pin), book a slot and reconcile stock.

Review

- **Control Center** — handle the review queue and approve or reject shipments.

ROLE • MANAGEMENT

Steering & oversight

Overview, safety, insight and content.

Oversight & safety

- **Control Center** — review shipments, set a kill switch per corridor, resolve reports.
- **Test feedback** — all submitted feedback arrives here, with user + page.

Insight

- **Usage & activity** — active users, who has been active, the funnel and behaviour (page views, check, clicks).
- **Analytics** — steering information and unit economics.

Management & content

- **Test Console** — drive the simulations (payment, verification).
- **Content & videos, ads, members** — manage what appears on the site and who has access.
